

3D Nordisk

INDUSTRIAL 3D MODELING

Experienced and Flexible Technical Consultants

MORE THAN MODELERS, WE ARE YOUR TECHNICAL PARTNERS

At 3D Nordisk, we transform ideas, drawings, and concepts into industrial 3D models ready for construction. We understand how facilities work in real life—not just on the screen. That’s why our designs are practical, precise, and created for efficient operation.

We are specialists in Autodesk Plant 3D and Inventor, with experience in gas, CO₂, biogas, LBG (Liquefied Bio-gas), and aquaculture plants. We optimize existing installations and develop new projects entirely from the ground up.

We speak Danish, English, and Spanish fluently, allowing us to work without language barriers, whether with international teams, suppliers, or customers. We work both remotely and on-site depending on the project’s needs, always with a flexible and solution oriented approach.

WHAT WE DO

Modeling in Plant 3D

Smart P&ID.

3D modeling of piping and equipment.

Reports, orthographic drawings, and isometrics.

Support with creation of items, valves, and fittings (SPEC).

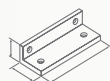

Mechanical Design in Inventor

Design of steel structures and assemblies.

Sheet Metal: plate modeling and bending.

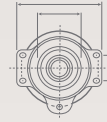

Technical drawings ready for production.

CLEAR COMMUNICATION AND EASY ACCESS

We work with BIM 360, Autodesk Construction Cloud (ACC) and Navisworks to coordinate the project in real time, no matter where each team member is located.

For open access, we use Autodesk Viewer, which is free and requires no license. This allows anyone involved in the project to view the design from any browser and stay aligned with the latest updates.

WHY CHOOSE 3D NORDISK?

- Extensive practical experience in gas, CO₂, LBG, biogas, and aquaculture, and open to other sectors such as the pharmaceutical industry and food production.
- Clean, coherent models with technical precision.
- Full flexibility. We work according to your standards and processes.
- Trilingual communication: Danish, English, or Spanish.
- Complete understanding: from the first idea to the final construction-ready drawing.

CONTACT US TO DISCUSS HOW WE CAN ASSIST YOU.

**HOURLY RATE:
600 DKK.**

The price covers all tasks and services we offer, with no extra fees or exceptions. You only pay for consulting time and gain full access to our expertise, tools, and technical support.

Contact us to discuss how we can support your current or future projects.
